

# Allen Peng Lu

11120 76 Ave NW Edmonton, AB. T6G 0J8 || Phone: 604-788-6862 || E-mail: [aplu@ualberta.ca](mailto:aplu@ualberta.ca)

LinkedIn: <https://www.linkedin.com/in/allen-lu-219115195/>

Self-motivated computer science student skilled in building and maintaining mobile applications while meeting time constraints. Well-versed in various algorithm design paradigms using discrete mathematics. Experienced in Object-Oriented design, analysis, and prototyping in teams of 3-6 developers.

## Core Competencies

- 
- 
- |   |                  |                      |
|---|------------------|----------------------|
| • Data Visualization                    | • Android Studio | • Python             |
| • Excel data forecasting and simulation | • C/C++          | • Python SQLite3/SQL |
- 
- 

## Education

- 
- 
- Computing Science, 3<sup>rd</sup> Year, University of Alberta (Sept 2016 – Scheduled for April 2021)

## Personal Projects

### Git handle: [ApluUalberta](https://github.com/ApluUalberta)

#### Mood-Tracker Android Studio Group Project (September 2019 – December 2019)

Glo – Android Mobile App

Github Link: <https://github.com/CMPUT301F19T03/GroupProject1>

- Programmed visually intuitive application in Java, tracks a user's emotional data along with their friends
- A collaboration of 6 group members using Github pull requests and SCRUM to encourage collaboration
- Google Maps and Firestore API to keep track of user mood, times, dates, reasons, and location data
  - o Extensive UI unit testing for proper database pulling, UI navigation, and feature implementation
- Extensive Revisioning of App Interfaces to provide an eye-pleasing interface with non-functional requirements
- Weekly team meetings, remote communication with discord, and extensive UML re-versioning
  - o Time used for optimizing team productivity, monitoring progress, and addressing design flaws.

#### Crime Statistics Database Program (March 2019 – April 2019)

Crime Statistics UI - Edmonton Open Data Initiative

Github Link: <https://github.com/ApluUalberta/Crime-Statistics-Database-Program>

- Simple Command Line Interface that allows for 4 complex database queries on a given Database
- Embedded SQLITE3 Queries in Python to create a terminal UI for users to easily query a database
- Graphed query data onto pie charts and bar graphs using Pandas and Matplot library functions
  - o Examples of functions: Plot.bar(), read\_sql\_query()
- Menu Entry runs 1 of 4 Queries depending on user input

#### Arduino Powerlifting Lock Box (December 2019 – Present)

Chalk Bowl Locking Mechanism – Arduino Uno

- Programmed Arduino Project to make a Weightlifting Chalk bowl lockable
- 4-digit keypad verification password Solenoid Door lock mechanism with a 6V Relay
- Secured in a locked Plywood container, attached to a hinge and a lid.
- Satisfying customer concerns by continuous prototype iterations to address design criticism and flaws

## Hobbies

- 
- 
- Powerlifting, Drone Photography, RC Vehicle Modification, E-Commerce Entrepreneurship
